To whom it may concern:

We have been working with NIMCO for a number of years. They have been a service provider for gas and diesel pump and tank work for the truck stops in Indiana and Illinois and clearly understand the urgency of our business. They are our first call and (like us) are available 24-7.

We have also worked with NIMCO on numerous construction related projects, both large and small. Whether it is replacing a spill bucket or installing new dispensers, canopies, and adding DEF or pulling/installing tanks and piping, we have been pleased that NIMCO satisfies our contracts every time.

I personally have not worked with a better contractor in the fuel business. They under promise and over deliver, and that is not always common in the service/construction business. I also appreciate how they can value engineer a project and help us find ways to save money by doing things smarter that usually save time as well.

NIMCO also works well with the State Indiana and Illinois, and the local townships where we do business. They obtain and work within their permits, and they deal well with IDEM and other environmental representatives.

The values instilled in this family business are apparent when working with the technicians and employees of NIMCO. I am happy to recommend them and honored that they asked me to do so.

Sincerely,

Mike Strzok
